WeRateDogs Twitter Data – Report

Introduction

This report will present my findings from the assignment where I analyzed some twitter data of dogs from the twitter page WeRateDogs. I used three datasets which contained information like the dog name, tweet text, retweet count, dog breed, favorite count among other information. The questions I answered using these data sets were;

Which tweet is the most retweeted ?

The most retweeted tweet had 79515 retweets
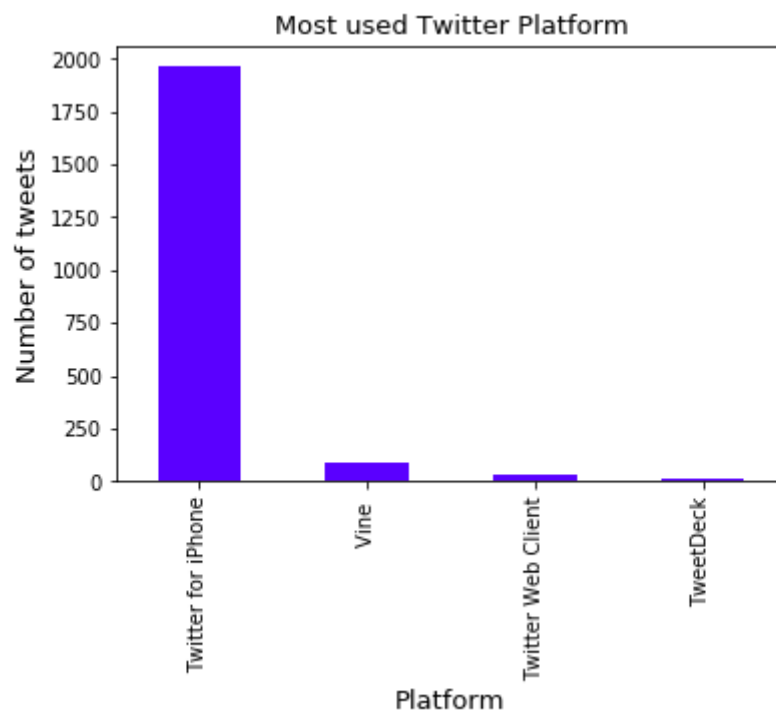

```
824      79515
Name: retweet_count, dtype: int64
```

Which tweet is most favorited?

The most favorited tweet had 132810 favorites.

```
325      132810
Name: favorite_count, dtype: int64
```

What is the most used Twitter Platform?

The diagram above shows that Twitter for Iphone was the most used plartform to tweet about dogs.

What is the relationship between Favorite and Retweet count?

The diagram above shows a strong positive correlation between favorite tweet count and retweet count. This mean pictures with a high number of retweets also got a high number of favourites.
